Rafael Cabrera Parga

SOFTWARE ENGINEER AND FULLSTACK WEB DEVELOPER

rafa.cabrera.parga at gmail.com
unodelostrece.com/cv/en

Summary

Fullstack developer with more than 9 years of experience as a backend and fullstack developer. I've been the technical leader in yodetiendas.com and moobis.tv, some of the last projects in wich I've participated and in which I've been partner and cofunder respectively.

I started my web development career as backend/fullstack developer using LAMP stack but in the last years I've changed to fullstack JavaScript with Node and React and also to backend development with Python/Django. Also evolved from REST API to GraphQL API development

I like learning new technologies and web development trends attending regularly to development conferences and meetups. Linux expert user and free and open source software promoter.

Experience

SEPTEMBER 17 - CURRENT

Fullstack sofware developer

dbentobox.com

Fullstack web engineer and mobile developer using the following technologies:

- Python/Django backend development.
- Relational databases as PostgreSQL and MariaDB

i3one Business Solutions

Projects in wich I participated:
www.muyinteresante.es
www.marie-claire.es
www.inspectoresdehacienda.org

Skill highlights

Software Architecture

PHP

HTML5

MySQL

Subversion

Javascript

Linux

Apache

Git

REST API

CSS

NodeJS

MongoDB

Python

Solr

React

Docker

Nginx

Education

Universidad Nacional de Educación a Distancia - U.N.E.D.

Postgraduate Degree in mobile app development

2010 - 2011

Universidad Pontificia de Salamanca en Madrid

Master's degree in Multimedia Engineering

2007 - 2008

Universidad de Las Palmas de Gran Canaria

Beca Séneca, estancia de 1 año en la ULPGC

2004 - 2005

Universidad Pontificia de Salamanca en Madrid

Engineer's Degree in Software Engineering

2000 - 2007

Idiomas

English

Full professional proficiency. C1 level

Polish

Limited working proficiency. B1 level

German

Elementary proficiency. A1 level
